

Function call-dependency graph (public schema)

Derived by scanning each function body in `05_functions.sql` for calls to other functions in this same set. Built via text-pattern matching against the exact captured source -- not guessed, not from docs.

Focus: financial / reward / order chain

- `hg_mark_order_paid` calls: (no calls to other captured public functions detected)
- `debit_wallet_atomic` calls: (no calls to other captured public functions detected)
- `credit_wallet_atomic` calls: (no calls to other captured public functions detected)
- `hg_add_hp_transaction` calls:
`hg_set_profile_tier_from_balance`
- `hg_add_wallet_transaction` calls: (no calls to other captured public functions detected)
- `hg_place_order` calls: `hg_add_hp_transaction`,
`hg_add_wallet_transaction`
- `hg_create_order_atomic` calls: `debit_wallet_atomic`,
`hg_add_hp_transaction`
- `claim_guest_order` calls: (no calls to other captured public functions detected)

- `hg_process_referral_reward` calls:
`hg_add_hp_transaction`
- `hg_credit_referral_milestone_atomic` calls:
`hg_add_hp_transaction`
- `hg_redeem_reward` calls: `hg_add_hp_transaction`
- `hg_purchase_marketplace_item` calls:
`hg_add_hp_transaction` , `hg_add_wallet_transaction`
- `record_hp_transaction_atomic` calls: (no calls to other captured public functions detected)
- `unlock_pending_hp_fifo_atomic` calls: (no calls to other captured public functions detected)
- `hg_credit_delivery_hp_atomic` calls:
`hg_add_hp_transaction`
- `hg_credit_order_hp` calls: `hg_add_hp_transaction`
- `hg_auto_credit_hp_on_delivery` calls:
`hg_credit_order_hp`
- `hg_trigger_referral_on_first_payment` calls:
`hg_process_referral_reward`
- `increment_monthly_hp_tracker` calls: (no calls to other captured public functions detected)

Full graph (all functions with at least one internal call)

- `hg_add_hp_transaction` ->
`hg_set_profile_tier_from_balance`
- `hg_auto_credit_hp_on_delivery` ->
`hg_credit_order_hp`
- `hg_auto_referral_code` ->
`hg_generate_referral_code`

- `hg_create_order_atomic` -> `debit_wallet_atomic`,
`hg_add_hp_transaction`
- `hg_credit_delivery_hp_atomic` ->
`hg_add_hp_transaction`
- `hg_credit_order_hp` -> `hg_add_hp_transaction`
- `hg_credit_referral_milestone_atomic` ->
`hg_add_hp_transaction`
- `hg_handle_new_auth_user` ->
`hg_generate_referral_code`
- `hg_on_banner_delete` -> `hg_delete_storage_file`,
`hg_extract_storage_path`
- `hg_on_event_delete` -> `hg_delete_storage_file`,
`hg_extract_storage_path`
- `hg_on_hp_transaction_insert` ->
`hg_set_profile_tier_from_balance`
- `hg_on_hp_transaction_reconcile` ->
`hg_set_profile_tier_from_balance`
- `hg_on_marketplace_listing_delete` ->
`hg_delete_storage_file`, `hg_extract_storage_path`
- `hg_on_menu_item_delete` -> `hg_delete_storage_file`,
`hg_extract_storage_path`
- `hg_on_profile_delete` -> `hg_delete_storage_file`,
`hg_extract_storage_path`
- `hg_on_profile_photo_update` ->
`hg_delete_storage_file`, `hg_extract_storage_path`
- `hg_on_reward_delete` -> `hg_delete_storage_file`,
`hg_extract_storage_path`
- `hg_place_order` -> `hg_add_hp_transaction`,
`hg_add_wallet_transaction`

- `hg_process_referral_reward` ->
`hg_add_hp_transaction`
- `hg_purchase_marketplace_item` ->
`hg_add_hp_transaction`, `hg_add_wallet_transaction`
- `hg_redeem_reward` -> `hg_add_hp_transaction`
- `hg_run_hp_expiry_check` -> `hg_add_hp_transaction`
- `hg_sync_hp_balance_from_ledger` ->
`hg_set_profile_tier_from_balance`
- `hg_sync_review_hp_columns` ->
`hg_add_hp_transaction`
- `hg_trigger_referral_on_first_payment` ->
`hg_process_referral_reward`
- `hg_verify_rider_delivery_assignment` ->
`hg_current_user_role`

Reverse index: what calls the critical financial functions

- `debit_wallet_atomic` is called by:
`hg_create_order_atomic`
- `credit_wallet_atomic` is called by: (none of the captured functions call this directly -- likely invoked only from your Python backend via RPC)
- `hg_add_hp_transaction` is called by:
`hg_credit_order_hp`, `hg_place_order`,
`hg_process_referral_reward`,
`hg_purchase_marketplace_item`, `hg_redeem_reward`,
`hg_run_hp_expiry_check`, `hg_sync_review_hp_columns`,
`hg_create_order_atomic`,
`hg_credit_delivery_hp_atomic`,
`hg_credit_referral_milestone_atomic`

- `hg_add_wallet_transaction` is called by:
`hg_place_order` , `hg_purchase_marketplace_item`
- `hg_mark_order_paid` is called by: (none of the captured functions call this directly -- likely invoked only from your Python backend via RPC)
